

A Function Packed Offering of Business Intelligence for Small and Medium Businesses

SAP BusinessObjects Edge Series is a feature rich bundle of the best and most effective Business Intelligence (BI) tools packaged and priced to fit the needs and budgets of both small and medium businesses.

SAP BusinessObjects Edge Series brings BI to the masses by providing an affordable entry point into the world of analyzing your data to identify issues, trends and patterns to help you make better and more effective business decisions.

While most Fortune 1000 companies have been taking advantage of Business Intelligence solutions for years, smaller and medium businesses have often found it cost prohibitive to get started, but with the new SAP BusinessObjects Edge Series offering, the most powerful and advanced BI tools are packaged in a concurrent license model at an incredibly low price making it affordable to all.

Extraction Transform and Load (ETL) Data Integrator

SAP BusinessObjects Edge Series

Edge Standard includes:

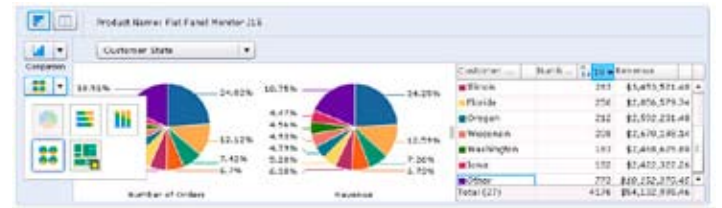

Web Intelligence: The leading ad-hoc reporting and analysis business intelligence tool widely acclaimed for its ease-of-use and remarkable on-screen functionality allowing users to interact with the report data through simple right-click or drag-and-drop actions.

Crystal Report Management and Scheduling: Schedule and manage your Crystal Reports in the same secure and versatile enterprise environment and utilize some of the user friendly features, like Encyclopedia, for providing information and guided analysis and Discussions for adding and viewing report specific comments.

Live Office: Integration with Microsoft Office where you can use the power of Business Intelligence to retrieve data directly from the data source or through a Crystal or Web Intelligence report from within Excel, Powerpoint or Word.

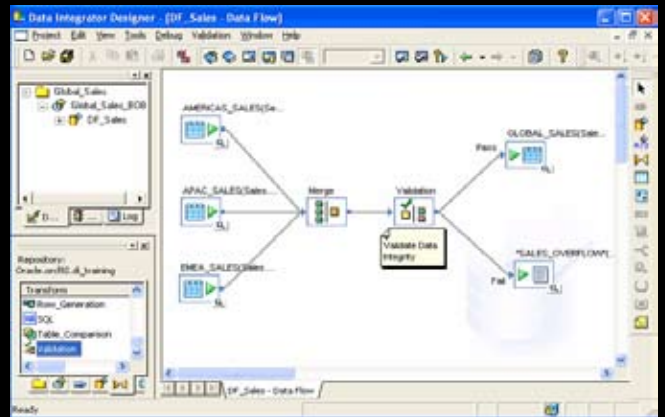

Polestar: Powerful search-based query solution that allows a casual user to quickly explore their data and to answer questions or find trends without any training or need for report development skills.

Edge Professional includes **Edge Standard** + ETL:

Xcelsius: The best data visualization and dashboard product on the market enabling you to quickly create amazing interactive dashboards that can be published and used within commodity formats like PDF, Word, Powerpoint and Outlook, show powerful trending and "What If?" scenarios and connect to live data sources.

Data Integrator: Add further Power and Flexibility to your Business Intelligence solution with one of the leading **Extraction, Transformation and Load (ETL)** solutions, Data Integrator. This includes Data Profiling, Data Quality transformations and end-to-end impact analysis for ensuring the data in your reports and dashboards is accurate and valid.
