

XDM - Xcelsius Dashboard Management

Business Intelligence Solutions

Finally, an Xcelsius Connectivity Option that is reliable, scalable, fast and breaks through the data limitation barrier.

HOLD ON TO YOUR SEATS!

XDM is a powerful distribution and management solution for Xcelsius dashboards, combining unique functionality, scalability and high performance, enabling you to deploy effective real-time and auto-refresh dashboard applications quickly and inexpensively.

Features include:

- ▲ Automatic scheduling of dashboard refresh and/or distribution based on time or external event
- ▲ Comprehensive e-mail dashboard delivery options
 - Attachment in different formats
 - Zip compression and encryption
 - In-line e-mail
 - Self-installing dashboard package for off-line usage
 - Dynamic distribution lists and unsubscribe options
- ▲ Intelligent Data Cache for optimal dashboard performance and scalability
- ▲ Retrieve data from a SQL database query or stored procedure against an SQL Server, Oracle, MS Access or any ODBC compliant database
- ▲ Powerful data formatting options, such as Cross Tab and Data Selector to precisely generate data ranges to feed directly into dashboard components
- ▲ Comprehensive monitoring and tracking of dashboard refreshes and distributions
- ▲ Database write-back feature
